Johan Ortiz

Systems Engineer & Data Extraction Specialist

San José, Costa Rica • ortizdelgadojohanjose04@gmail.com • +506 8760-1125 (WhatsApp) • LinkedIn • GitHub • Apify Store • Portfolio • Live Web App

PROFESSIONAL SUMMARY

Production-focused Systems & Data Extraction Engineer with a proven track record of architecting scalable web scrapers and automation pipelines. Built and published **12+ high-performance Apify Actors** serving active users, maintaining a **90%+ run success rate** against enterprise-grade anti-bot systems. Driven by delivering resilient software engineering solutions in production rather than proof-of-concept code.

EXPERIENCE

Freelance / Apify Publisher & Data Extraction Engineer
Remote | 2026 – Present

- Architected, deployed, and monetized **12+ production-ready Apify Actors** using Python, Playwright, FastAPI, and BeautifulSoup, handling millions of request cycles monthly.
- Engineered resilient anti-scraping bypass strategies using dynamic residential proxy rotation, request headers fingerprinting, and session simulation, achieving a **90%+ overall run success rate**.
- Designed custom ETL and data pipeline architectures to parse unstructured DOM elements into clean JSON/CSV feeds with automated payload validation and error-handling routines.
- Maintained continuous deployment pipelines, active monitoring, and API maintenance across public scraping actors.

SELECTED PROJECTS (12 APIFY ACTORS)

Apify Analytics Dashboard (Live Web App)
Full-Stack application built with Next.js, TypeScript, and Tailwind CSS. Connects directly to the Apify API and PayPal API to monitor scraper health, success rates, and revenue. Includes custom admin security (cookie-based) and a dark-mode UI. View Code on GitHub

YouTube Channel & Video Intelligence Actor
Scalable channel metric & transcript extraction tool with automated pagination, retry logic, and proxy balancing.

LinkedIn Data & Profile Scraper
High-speed structured data parser utilizing custom session management and request header spoofing.

E-Commerce Real-Time Price Monitor
Event-driven dynamic site monitor tracking inventory & price fluctuations across JS-rendered targets.

Smart Data Extractor (No APIs)
General-purpose web crawler extracting structured data (titles, prices, emails) using pure Python with zero API costs.

AI Content Detector
Statistical analysis tool to detect AI-generated text without external API dependencies.

URL to Markdown for AI Agents
Converts webpages to clean Markdown, optimizing RAG pipelines with fail-safe error handling.

B2B Email Extractor
Extracts business emails from domains, filtering blocked sites and detecting tech stacks.

Email Validator API
Validates emails via syntax checks, MX records, and disposable detection for clean B2B databases.

Company Enrichment API
Enriches domains with tech stack, descriptions, and social links for lead generation.

Google Trends Scraper
Bypasses 429 limits using residential proxies and smart sessions. +99% success rate.

Web Metadata Extractor
Extracts titles, descriptions, and Open Graph images from any webpage without JavaScript. Perfect for SEO and RAG pipelines.

Bluesky Scraper & API
Extracts posts, likes, and metadata from Bluesky using the public AT Protocol API. No login required.

TECHNICAL SKILLS

Languages
Python (Main), C#, JavaScript, SQL, HTML/CSS

Frontend & UI
Next.js, React, TypeScript, Tailwind CSS

Frameworks & Libraries
FastAPI, Playwright, BeautifulSoup, Selenium, Requests, Pydantic

Web Scraping & Infra
Apify Platform, Residential Proxies, Dynamic Fingerprinting, Anti-Bot Bypass (Cloudflare, Akamai)

Tools & DevOps
Git, GitHub, Docker, CI/CD, Webhooks, REST APIs, Vercel, Linux/Bash

EDUCATION

Python AI Engineer (In Progress)
DevSenior Code | 2026

Systems Engineering (In Progress)
Universidad Internacional San Isidro Labrador (UISIL) | 2025 – 2027

LANGUAGES

Spanish: Native
English: Basic (Technical reading & writing)
